DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 4 recites the limitation "the quick connect fitting" in line 1. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2 and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by **Fehrenbach et al. '320**.

The patent to **Fehrenbach et al. '320** discloses a fuel pressure pulse damper including a first fitting (17) for receiving pressurized fuel and a second fitting (13) for connection to a fuel rail for supplying pressurized fuel to the fuel injectors of the vehicle engine. A diaphragm (4) forming a first chamber (7) that communicates to pressurized fuel entering the first fitting and leaving the second fitting and a second gas sealed chamber (6) on an opposite side of the

diaphragm, as recited in claim 1. The body includes first (2) and second (3) housings that mate together to define the chamber and to trap a peripheral edge of the flexible diaphragm such that the diaphragm divides the chamber into first and second chambers, the diaphragm flexing in a manner to attenuate fuel pressure pulses in the fuel system, as recited in claim 2.

Allowable Subject Matter

4. Claim 12 is allowed.
5. Claims 3, 5-7 and 9-11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Fehrenbach et al., '854, Kemmner et al., Ito et al. are all pertinent to Applicant's invention in disclosing damping devices utilized in fuel systems.
